

JERIC SEMENIEGO

Junior QA Analyst · QA Support · UAT Support

Pasig City, Metro Manila • +63 961 871 1368 • jeric.semeniego.work@gmail.com • jericsemeniegowork-boop.github.io/portfolio/

SUMMARY

QA Analyst with around 2.5 years of QA-related experience in manual, regression, and UAT testing. Comfortable writing test cases, replicating issues, logging defects, and tracking them through ServiceNow and Jira. Strongest in hands-on manual testing and SAP S/4HANA validation, with Postman API checks and basic SQL, Selenium, and Python to support regression work. Used to working in Agile teams on enterprise systems.

CORE SKILLS

QA & Testing: Manual Testing, Functional Testing, Regression Testing, Smoke/Sanity Testing, UAT, UI Testing, Defect Reporting, Test Case Validation, Release Validation, Bug Tracking

Automation & API: Postman API Checks (JavaScript), Basic SQL Validation, Basic Selenium / Python Exposure

Tools: ServiceNow, Jira, SAP S/4HANA (SD, HANA), Microsoft Excel, Google Sheets, Microsoft Word, SharePoint, Browser DevTools, Git/GitHub, Azure DevOps, MySQL

Support & Ops: Ticket Handling, Incident Management, Escalation Coordination, Technical Troubleshooting, Process Documentation, Workflow Validation

AI & Doc Review: PRD Review, Schema Compliance, Rubric-Based Assessment, Golden Path Validation, AI Output Quality Review

PROFESSIONAL EXPERIENCE

Scale AI / Outlier

Apr 2026 – Present

AI Evaluation Contractor · Freelance, Remote

- Reviews AI-generated outputs against quality rubrics, flagging schema errors, instruction-following issues, and quality gaps in each task.
- Checks PRDs and workflow steps to confirm each output is accurate, consistent, and follows the expected path.

HCLTech

Oct 2025 – Dec 2025

Analyst - Senior Analyst Program · Hybrid

- Handled escalated, high-priority issues during the Senior Analyst program that were blocking a live client from moving forward.
- Owned a specific test area end-to-end on a real client system, deciding the testing approach, planning the coverage, and running the validation independently.
- Investigated complex workflow failures and data issues to find the root cause and document clear resolutions, applying requirement review, risk-based test planning, and defect tracking; used Selenium and Python where automation helped.

Accenture

Mar 2024 – Oct 2025

Business Architect / Software Engineer · Hybrid · Function: SAP QA and IT Support

- Tested SAP S/4HANA business processes (SAP SD and HANA, accessed through Citrix) across regression, smoke, UI, and UAT, working through multiple modules and release cycles.
- Tested APIs in Postman with JavaScript checks, ran basic SQL queries to confirm data, and used basic Selenium and Python scripts to support regression during releases.
- Dug into workflow failures, data mismatches, and system defects using SAP tools, SQL, and ServiceNow to find the root cause and get them resolved.
- Handled around 10 tickets a day in ServiceNow, keeping clear validation notes, escalation records, and a close-out report on every one.
- Worked with QA and support teams in Agile sprints to retest fixes and keep the system stable, and kept testing reports and release records up to date.

Self-Employed

Oct 2023 – Present

Freelance QA Tester · Remote · Concurrent with other roles

- Continues to take freelance manual testing engagements alongside primary roles, delivering functional and regression testing for clients on short-term and one-time contracts covering web applications and software workflows.
- Uses Selenium for UI checks, Postman for APIs, SQL for data, and Jira to track defects, picking the right tool for what each client needs.

iQor

Jan 2024 – Mar 2024

Account Manager Expert · Onsite

- Handled customer accounts in a busy telco support role, verifying accounts, logging issues in Hercules, escalating problems, and following compliance rules on every case.

TCL Online Services

Feb 2023 – Oct 2023

QA Trainee / Technical Support Representative · Onsite

- Worked QA internship tasks (process research, workflow mapping, documentation) alongside support, resolving around 30 hardware and software issues a day.
- Validated issues, ran follow-up checks and basic functional tests, escalated the tricky ones, and kept clear notes in the ticketing system.

PROJECTS

Warehouse Inventory Monitoring System with Barcode Scanner and SMS Notification

BS Information Technology Capstone Project · Systems Technology Institute - San Pablo · December 2022

- Built a desktop warehouse inventory system for Paring's Pharmacy as the BSIT capstone, delivering a real working tool to an actual client.
- Built core modules for product record management, stock level monitoring, expiration date tracking, and a warehouse status dashboard; integrated barcode scanner functionality and SMS notifications for automated low-stock and expiration alerts.

QA Portfolio: Manual QA Case Studies

GitHub Pages · jericsemeniegowork-boop.github.io/portfolio/

- Built three QA practice case studies (a service filing workflow, a banking app, and a game patch) as self-made portfolio samples, each with a full set of test plans, RTM, defect reports, and checklists.

EDUCATION

Bachelor of Science in Information Technology · Systems Technology Institute - San Pablo

Jun

2019 – Sep 2023

CERTIFICATIONS & TRAINING

SAP & QA: SAP S/4HANA Associate-Level Training, SAP SD Functional Training, Agile Testing & Quality Engineering, Agile & Scrum Practices \u2014 Accenture

Cloud, AI & Technical: AWS Cloud Practitioner \u2014 Accenture; Generative AI \u2014 Harvard Online; Computer Systems Servicing NC II \u2014 TESDA
