

JERIC SEMENIEGO

Manual QA Analyst | UAT Support | Application Support | Automation Exposure
Pasig City, Philippines | +63 961 871 1368 | jeric.semeniego.work@gmail.com | [Portfolio](#) | [GitHub](#)

SUMMARY

QA and application support professional with hands-on experience in manual testing, regression validation, UAT support, issue replication, defect documentation, ticket handling, and release validation. Strong in validating business workflows, documenting expected versus actual results, capturing evidence, and coordinating follow-ups with stakeholders. Best fit for Manual QA, UAT Tester, QA Support, Application Support, Service Desk, and entry-level automation-support roles. Portfolio demonstrates full manual STLC artifacts plus supporting Postman, SQL, Selenium/Python, Browser DevTools, and GitHub exposure.

BEST-FIT ROLES

Manual QA Tester | Junior QA Analyst | UAT Tester | QA Support Specialist | Application Support Analyst | IT Support / Service Desk Analyst | Technical Support Analyst

CORE QA AND TOOL STRENGTHS

- **Manual QA:** Functional testing, regression testing, smoke checks, sanity checks, exploratory checks, defect retesting, UAT support, acceptance testing, and end-to-end workflow validation.
- **Test Artifacts:** Requirement analysis, test plans, test scenarios, manual test cases, test data, RTM, regression checklists, UAT checklists, execution reports, test summary reports, and release validation checklists.
- **Defect and Ticket Work:** Issue replication, expected vs. actual results, severity/priority, screenshots/evidence, retesting, closure confirmation, ServiceNow and Jira-style workflows.
- **Tools:** ServiceNow, Jira-style ticketing, Microsoft Excel, Google Sheets, GitHub, Chrome, Microsoft Edge, Browser DevTools / console error awareness.
- **Technical Exposure:** Postman checks, JSON response validation, SQL SELECT/WHERE/ORDER BY/COUNT, audit/history validation, Selenium/Python basics, SAP S/4HANA, SAP Business One.

EXPERIENCE

Business Architect / Software Engineer - QA, UAT & Application Support

Accenture | May 2024 - July 2025

- Supported SAP S/4HANA and enterprise business process initiatives through manual validation, UAT support, ticket investigation, documentation, and release follow-through.
- Executed regression and process validation during system resets, updates, and release cycles; documented outcomes, evidence, confirmations, and follow-up actions.
- Investigated assigned issues, reproduced reported behavior, captured expected versus actual results, and coordinated issue details through ServiceNow/Jira-style workflows.
- Prepared and maintained technical documentation, handover notes, and process references aligned with project requirements, compliance expectations, and stakeholder needs.
- Collaborated with Agile teams and business stakeholders to support digital transformation work, issue clarification, validation coverage, and release readiness.

Account Manager Expert

iQor | January 2024 - March 2024

- Handled confidential client account concerns with accuracy, professionalism, and compliance awareness in a fast-paced BPO environment.
- Documented follow-ups, clarified account-related issues, and maintained organized communication with clients and internal teams.
- Strengthened stakeholder communication, attention to detail, and process discipline useful for QA support and application support roles.

Technical Support Representative

TCL Online Services | July 2023 - October 2023

- Delivered remote technical support for appliances and IT-related systems, diagnosing issues and guiding users through resolution steps.
- Documented recurring issues, resolution notes, and user-impact details to support ticket handling and process improvement.
- Verified fixes and outcomes through structured follow-up, improving troubleshooting discipline and support quality.

Quality Analyst Trainee

TCL Online Services | February 2023 - June 2023

- Trained in manual QA testing, IT troubleshooting, test documentation, system reliability checks, and issue observation.
- Conducted manual validation checks to confirm expected behavior, identify reliability concerns, and support system stability.
- Developed a production testing simulator using web design and system development practices, strengthening practical QA and technical support exposure.

PORTFOLIO PROJECT

Purchase Request and Approval Management System - Manual QA Case Study

GitHub Pages Portfolio | GitHub Repository

- Built a non-confidential QA case study showing full manual STLC: requirement analysis, test planning, test scenarios, manual test cases, RTM, test data, defect reports, regression checklist, UAT checklist, execution report, test summary report, and release validation checklist.
- Designed manual testing coverage for functional, smoke, sanity, exploratory, end-to-end workflow, acceptance/UAT, defect retesting, regression, and release validation scenarios.
- Covered realistic workflow risks including missing required fields, invalid or boundary amounts, unauthorized approval, duplicate/invalid status actions, status mismatch, missing rejection reason, editable approved request, and incomplete history/audit trail.
- Included automation-ready supporting checks: Postman API response validation, SQL status/history validation, Browser DevTools/console awareness, and a simple Selenium/Python read-only behavior sample.

TESTING COVERAGE AND AWARENESS

- **Manual vs. Automation:** Primary strength is human-driven manual testing; understands automation as scripted validation for stable, repetitive regression and CI/CD-friendly checks.
- **Functional Testing:** Validates business requirements through positive, negative, boundary, role-based, workflow, form validation, status validation, and expected versus actual result checks.
- **Regression and Release Testing:** Impacted test case reruns, defect retesting, smoke checks, post-release validation, known issue tracking, and release readiness notes.
- **UAT and E2E Validation:** Business workflow checks from start to finish, stakeholder confirmations, user feedback documentation, acceptance criteria validation, and sign-off support.
- **Technical Testing Awareness:** Basic understanding of unit, integration, system, API, SQL, performance observation, security-related behavior, compatibility, and reliability checks from a QA support perspective.
- **Automation-Ready Exposure:** Basic Selenium/Python concepts, Postman response checks, SQL validation queries, DevTools/console error awareness, and GitHub documentation.

EDUCATION AND CERTIFICATIONS

Bachelor of Science in Information Technology

STI College San Pablo | 2023

Certifications: SAP Business One Basic & Advanced | ISO 9001:2015 QMS - 2023

SOFT SKILLS

- **Communication:** Clear ticket notes, client/stakeholder updates, defect summaries, handover notes, and issue follow-up communication.
- **Quality Mindset:** Comfortable with repetitive validation, documentation accuracy, evidence capture, and release checks.
- **Adaptability:** Open to manual QA, automation-support exposure, UAT, application support, IT support, service desk, and technical support roles.
