

JERIC SEMENIEGO

QA ANALYST

Pasig City, Metro Manila • +63 961 871 1368 • jeric.semeniego.work@gmail.com • jericsemeniegowork-boop.github.io/portfolio/

SUMMARY

QA Analyst with professional experience in manual testing, regression testing, UAT support, and enterprise application validation across SAP S/4HANA, ServiceNow, and web-based systems. Hands-on with Selenium automation using Python, API testing via Postman with JavaScript scripts, SQL data validation, defect reporting, and release documentation within Agile environments.

CORE SKILLS

QA & Testing: Manual Testing, Functional Testing, Regression Testing, Smoke/Sanity Testing, UAT, UI Testing, Defect Reporting, Test Case Validation, Release Validation, Bug Tracking

Automation & API: Selenium (Python), Postman (JavaScript), Basic Automation Validation

Tools: ServiceNow, SAP S/4HANA, SQL, SharePoint, GitHub, Browser DevTools, Excel / Google Sheets, Jira

Support & Ops: Ticket Handling, Incident Management, Escalation Coordination, Technical Troubleshooting, Process Documentation, Workflow Validation

AI & Doc Review: PRD Review, Schema Compliance, Rubric-Based Assessment, Golden Path Validation, AI Output Quality Review

PROFESSIONAL EXPERIENCE

Scale AI / Outlier

Apr 2026 – Present

AI Evaluation Contractor · Freelance, Remote

- Reviews AI-generated outputs for QA validation and automation-related quality checks, applying schema validation, defect identification, and instruction-following assessment frameworks.
- Evaluates PRDs, test scenarios, and golden path workflows to verify consistency, accuracy, and compliance against defined evaluation criteria.

HCLTech

Oct 2025 – Dec 2025

Senior Analyst Trainee · Training Program

- Completed intensive automation testing training covering Selenium, Python, API testing, and structured QA validation processes under the Senior Analyst program.
- Executed Selenium-based automation validation checks using Python to verify UI behavior and workflow stability; investigated defects, data inconsistencies, and failures while supporting incident tracking, documentation, and QA reporting.

Accenture

Mar 2024 – Oct 2025

Business Architect / Software Engineer · Hybrid · Function: SAP QA and IT Support

- Executed SAP S/4HANA business process validation covering ticket handling, regression, smoke, UI, and UAT testing across multiple modules and release cycles.
- Ran Selenium-based test scripts using Python for automation-supported validation checks and conducted API testing using Postman with JavaScript validation scripts during regression activities.
- Investigated workflow failures, data discrepancies, failed processes, and system defects using SAP tools, SQL queries, and ServiceNow to identify root causes and support resolution.
- Processed approximately 10 tickets daily in ServiceNow, maintaining validation notes, escalation records, status tracking, and close-out reporting across active incidents.
- Collaborated with QA and support teams in Agile environments to verify fixes and maintain application stability; produced documentation, testing reports, and release validation records across multiple business processes.

Self-Employed

Oct 2023 – Mar 2024

Freelance QA Tester · Remote

- Delivered manual functional and regression testing for multiple clients on short-term and one-time contracts, covering web application behavior, UI validation, data handling, and end-to-end workflow verification.
- Applied Selenium, Postman, SQL, Jira, Python, and JavaScript across client projects for browser-based validation, API response checks, data integrity verification, and defect tracking.

iQor

Jan 2024 – Mar 2024

Account Manager Expert · Onsite

- Handled customer account support across account verification, issue documentation, escalation coordination, and client communication while maintaining strict compliance and confidentiality standards.

TCL Online Services

Feb 2023 – Oct 2023

QA Trainee / Technical Support Representative · Onsite

- Supported QA internship activities through process research, workflow mapping, and documentation while resolving an average of 30 hardware and software support issues daily.
- Executed issue validation, follow-up checks, and basic functional testing; escalated complex concerns and maintained technical documentation using internal ticketing tools and TCL software.

PROJECTS

Warehouse Inventory Monitoring System with Barcode Scanner and SMS Notification

BS Information Technology Capstone Project · STI College San Pablo · December 2022

- Co-developed a desktop-based warehouse inventory monitoring system for Paring's Pharmacy as the BSIT capstone project, delivering a real working solution to a live client.
- Built core modules for product record management, stock level monitoring, expiration date tracking, and a warehouse status dashboard; integrated barcode scanner functionality and SMS notifications for automated low-stock and expiration alerts.

QA Portfolio: Manual QA Case Studies

GitHub Pages · jericsemeniegowork-boop.github.io/portfolio/

- Developed three end-to-end, non-confidential QA case studies covering purchase request workflow validation, banking application testing (SecureBank), and game economy patch testing (Frostwater Lake), each with a full artifact set including test plan, RTM, defect reports, and release validation checklist.

CSE Review Studio: Mobile-First Exam Review Web App

HTML, CSS, JavaScript · Vercel

- Designed, built, and manually tested a fully responsive exam review web application featuring 1,100+ practice questions, mock exams, topic drills, formula lessons, and progress tracking; validated navigation flow, data persistence, and cross-device UI behavior through structured functional and regression testing.

EDUCATION

Bachelor of Science in Information Technology · STI College San Pablo

Jun 2019 – Sep 2023
